

Introduction

September 2019

Overview

America is at a crossroads as we approach the 245TH year (2021) as an independent Constitutional Republic. Our freedoms are increasingly challenged by an ever-growing advance of Socialism. Once the cancer of Socialism has taken root, it always metastasizes into Tyranny.

America's rights as outlined in the Declaration of Independence, the U.S. Constitution, the Bill of Rights and Amendments are symbolized in heroic monument form by The Statue of Liberty. Those rights remain the bedrock principles upon which our country stands.

*“When the government fears the people, there is Liberty.
When the people fear the government, there is Tyranny.”*

Thomas Jefferson

Individual freedoms are slowly being eroded and can be seen as fraying around the edges. Without our freedoms, our stated rights of self-rule will be out of reach in the daily lives of each of us. In large part our government has lost its way. Instead of acting to protect the rights and freedoms of our citizens, and limiting itself to the few enumerated duties as listed in the U.S. Constitution, our government has taken upon itself the role of dispenser, retainer, and arbiter of any rights and freedoms it deems justified to secure for itself.

A burgeoning, unelected administrative bureaucratic establishment threatens to eclipse our three branches of government. A distorted legal environment circumvents the role of Congress by imposing policies and laws not reflective of the will of the people. A significant portion of the media has abandoned all pretense of balanced and factual reporting of the news in favor of creating news that fits their personal and corporate biases and political agendas.

In order for America to continue to stand as a beacon of liberty **and** freedom, a second heroic monument, the Monument To Endure Freedom, must be erected on the West Coast to act as a companion to the Statue of Liberty on the East Coast.

The mission of the Monument To Endure Freedom is to provide on-site and outreach interactive educational programs about the founding principles of America to current and future generations. This mission will emphasize the opportunities, duties and responsibilities that every citizen must internalize, embrace and practice, to ensure America's role as defender of individual liberty and freedom.

*"An educated citizenry is a vital requisite
for our survival as a free people!"*

Thomas Jefferson

Together, these two monuments will frame our country from East to West with the inspiring message that our 'great experiment in self-governance' continues to provide a shining light of hope to a world more and more enveloped by darkness and evil.

Our Founding Fathers, as well as other wise individuals, knew all too well that without our individual freedoms to live, to labor, and to apply those inalienable rights, that in time they would devolve into mere words on a page.

*"Those who expect to reap the blessings
of freedom, must, like men, undergo the
fatigues of supporting it."*

Thomas Paine

*"Everything that is really great and inspiring
is created by the individual who can
labor in freedom."*

Albert Einstein

*"Freedom is never more than one generation away from extinction.
We didn't pass it to our children in the bloodstream.
It must be fought for, protected, and handed on for them to do the same."*

Ronald Reagan

Lady Liberty **and** Brother Freedom will stand as proud sentries to American Exceptionalism. Together these two symbolic companions of Liberty and Freedom will highlight America's quest to enshrine and protect 'life, liberty, and the pursuit of happiness' for all our citizens.

Our rights live in the law. Our freedoms live in our access to those laws. Lady Liberty shines light on our rights. Brother Freedom will shine light on our freedoms.

The crossroads America stands at today offer two paths: One to a dedicated, purposeful renewal of the principles that make America unique in the world, the other to a slippery slope of apathy away from our principles, which will end in tyranny.

"Great moments are born from Great opportunities", said famed 1980 U.S. Gold Medal Olympic Hockey coach Herb Brooks. The building of the Monument To Endure Freedom is such a great opportunity. All that remains is for someone to seize this great moment.

The time to build the Monument To Endure Freedom is now! This is our cause from which we will not retreat. We stand as a non-partisan, pro-patriotic, grassroots movement of private American citizens.

You are invited to join us in this historic and timely monument project.
