

# FREEDOM ALLIANCE, LLC

– A VETERAN OWNED COMPANY –

## Our Mission

September 2019

### **Our mission is big. It is bold. It is rooted in preserving individual freedom!**

We will build the Statue of Freedom on America's West Coast at a location close to the same latitude of the Statue of Liberty – 40 degrees North latitude. It will stand the same height as Lady Liberty – 305 feet tall. It will be crafted from bronze. It will be engineered with the latest techniques to withstand earthquakes of any intensity. America's two founding principles of Liberty and Freedom will be represented on our East and West coasts, declaring to our citizens and the world that we will forever stand together in defense of these founding principles.

The Statue of Freedom will be our country's clarion call to all who choose freedom over Tyranny and Socialism, who choose individual rights over government excess and overreach, who choose to honor God over the arm of man.

Lady Liberty *and* Brother Freedom will stand as proud sentries to American Exceptionalism. Together these two symbolic companions of Liberty and Freedom will highlight America's quest to enshrine and protect '*life, liberty, and the pursuit of happiness*' for all her citizens.

Once built and dedicated, the on-going mission of the Statue of Freedom will be to provide both on-site and outreach interactive educational programs that teach the founding principles of America to current and future generations.

The time to build the Statue of Freedom is now! This is the cause from which we will not retreat. We stand as a non-partisan, pro-patriotic, grassroots movement of private American citizens... You are invited to join us in this historic and timely undertaking.

**Daniel L. Bolz**
